Cheetham Subsector is subsector A of the Dark River Sector. It contains 12 worlds and the Kingdom of Rsvc. The highest TL is E at Cheyod and the highest population is 4 billion at Rote. The subsector takes its name from the world of Cheetham, which is the former name of Cheyod. When the world changed its name, the subsector's name remained what it was.

The seven "cities" of Cheyod are all orbital complexes. The names of these complexes are, in order of size: Carmel, the largest, Hadorn, Emeril, Youngstar, Oderis, Dayana, and Sigfried. Only a few mines are maintained on Cheyod's surface by the Hadorn, Emeril, and Youngstar corporations.

All bases in the subsector are owned by the Kingdom of Rsvc which maintains them to keep supply and communication lines open to the rimward end of the Vanguard Reaches Sector. The naval base at Sikapa is little more than a refueling stop.
