La Grone Subsector is subsector B of the Dark River Sector. It contains 14 worlds all of which are independent. The highest TL is D at Brekotaur, and the highest populations are 4 billion on Pralor and 7 billion on Bon. The subsector takes its name from the tributary of the Dark River Rift which passes through it.

The Ahik Corporation mines the world of that name for noble gases in its atmosphere.

Ode is a failed mining community which never had its starport upgraded. A few families still make the scattered domes their home.

The scout base at Ode is owned by Brekotaur.

The scout base at Ayami is owned by Senoth.
